Documentation with ReadTheDocs

User documentation frequently evolves so members of the OpenGATE collaboration have set up ReadTheDocs toolkit to help them work more efficiently with such a dynamic content. You can easily propose modification in any page of the documentation by using the '**edit on GitHub**' button from the small menu in the bottom right corner of the page ('**v:latest**'). It will open an editor to make modification that may be then submitted by using a **Pull Request**. Once reviewed and validated by the Gate dev team, the modification will be available for everyone.
