

GATE using Docker

A docker image for gate version 9.0 is available here:

[Click here to download GATE 9.0 on docker\(https://hub.docker.com/r/opengatecollaboration/gate\)](https://hub.docker.com/r/opengatecollaboration/gate)

EXAMPLE TO INSTALL GATEV9.0 WITH DOCKER ON AMAZON WEB SERVICES (AWS) (**AMAZON LINUX MACHINE**):

```
# First: create and launch a Linux Virtual Machine on AWS
# Second: register your local machine ssh public key to AWS
# connect with ssh to your new Amazon Server VM on AWS (replace "IPv4" with
the corresponding address)
ssh ec2-user@ec2-"IPv4".eu-west-3.compute.amazonaws.com
# install docker
sudo yum update -y
sudo yum install docker
sudo service docker start
sudo usermod -a -G docker ec2-user
#logout
exit
# log back in
ssh ec2-user@ec2-"IPv4".eu-west-3.compute.amazonaws.com
docker info
docker run -it opengatecollaboration/gate:8.2
Gate
```

EXAMPLE TO INSTALL GATEV9.0 WITH DOCKER ON AMAZON WEB SERVICES (AWS) (**UBUNTU LINUX MACHINE**):

```
# First: create and launch a Linux Virtual Machine on AWS
# Second: register your local machine ssh public key to AWS
# connect with ssh to your new Ubuntu Server VM on AWS (replace "IPv4" with
the corresponding address)
ssh ubuntu@ec2-"IPv4".eu-west-3.compute.amazonaws.com
# install docker
```

```
sudo apt update
sudo apt install -y docker.io
# to run docker without sudo
sudo usermod -a -G docker ubuntu # and then log out and back in
# launch a docker container with GATE
docker run -it opengatecollaboration/gate:8.2
Gate
```
