1) Type Isotope Symbol
and Mass Number:
(no blanks)
ex: I131 or In111 or Na22

hit the ReturnKey!!

go to next slide

UsedMacro CameraType ViewPointThetaPhi VisuOnOff SourceActivity Type in isotope, e.g. Na22 SourceType RootFileName CrystalMaterial SourceRad PhanRmax PhanRmin PhantomMaterial SourceVolMaterial **2) select camera type:**

Sphere, 2heads,...

select activity

3) click Check
and more items will
show upmodify parameter,
if required**go to next slide**

FIGURE 10-7 Pulse-height spectra recorded for ^{111}In with a NaI(Tl) well counter detector. *Top*, Coincidence summing between the x-ray and γ -ray emissions results in additional peaks in the spectrum when the source is inside the well. *Bottom*, When the source is outside the well, the probability of coincidence detection decreases and the coincidence peaks disappear.
